

Mark Fazzio Senior Software Engineer

mark@markfazzio.com | 973.714.7345 | markfazzio.com | github.com/markfazzio

About Passionate about creating rich, highly interactive applications using the JAMstack approach; serverless, React, CDN, static site generators, Redux, FaunaDB, etc.

Experience **Senior Software Engineer** | Fiserv – Parsippany, NJ | 2019 – Present

Current

- Created and currently maintain a framework of functional, company-branded React components written in Typescript, as well as supporting documentation which is utilized by several product teams across the company
- Lead developer and creator of the EPP React application; in charge of reviewing all incoming code and making necessary technological decisions
- Trained developers across the company on React/Typescript best-practices, usage of internal code resources, Git, and other relevant topics

Past **Senior Application Developer** | ADP – Roseland, NJ | 2015 – 2019

- Contributed to development of a future-facing AI/ML application for the Innovation Lab using ReactJS / Typescript / Node / Docker / GoLang / GraphQL / Jenkins
- Created and maintained multiple in-house code frameworks/libraries including a CSS framework, React components library, and a React icons library as well as provided support and documentation for all
- Developed a custom Wordpress application using the REST API to be the home of UX at ADP and showcase the components as well as garner feedback from teams across the company

Past **Interactive Developer** | Nickelfish – Mendham, NJ | 2011 – 2015

- Developed cross-platform-compatible applications using an in-house PHP MVC framework
- Developed custom Wordpress and Drupal applications, wrote custom PHP code to extend the frameworks per client needs
- Coded XML layouts for large scale Android applications
